1 EXECUTIVE SUMMARY

Since its designation as a UNESCO City of Crafts in 2009, Kanazawa has established the “Kanazawa Creative City Steering Program” with public-private partnerships, based on three goals: linking of culture with business, training of new artisans and international promotion of crafts. The city’s priority in terms of its strategic plan is the promotion of Kanazawa as a Creative City.

Vision of the Creative City of Kanazawa

1. Linking Culture with Business

We aim to produce highly value-added products that use our traditional crafts and techniques, to promote manufacturing based on the artisan spirit, and to develop many creative industries that can break into the international market.

2. Cultivation of Human Resources for Cultural Development

We aim to create opportunities for the next generation of manufacturers and young people involved in culture and art to grow, gather, compete and demonstrate their creativity, as well as to develop a city whose residents love and take pride in their traditional crafts and performing arts, and enjoy a good quality of life by participating in cultural events, while supporting artisans and artists.

3. Attracting International Attention

We aim to promote close relationships among artisans, artists and people in industry through the creative cities network, as a hub of international exchange, facilitate international conferences on topic such as the visions of cities and local communities in the 21st century, global issues, and world peace, and invite many people from Japan and foreign countries.

1. Linking of Culture and Business

Kanazawa aims to produce high-value products based on traditional crafts and technical craft skills, to promote the creation of works based on the local artisan spirit, and to develop creative industries with the potential to break into the international market.

Kanazawa Craftwork Business Creation Agency

The Kanazawa Craftwork Business Creation Agency was established in April 2011 to expand craft sales channels and disseminate information on crafts. The agency carries out various activities to support craft business, including the branding of "Crafts for your lifestyle - Kanazawa", seminars for the expansion of sales channels, the collection and dissemination of information on crafts, and the promotion of new craft business.

In order to adapt traditional crafts to modern lifestyles, Kanazawa established the Institute for the Promotion of Kaga Yuzen Techniques in July 2009, and the Institute for the Promotion of Kanazawa Metal Leaf Techniques in July 2010. These institutes conduct research on sustaining industrial/technical skills, the development of new products and market expansion.

2. Cultivation of human resources for cultural development

Kanazawa aims to create opportunities for the next generation of manufacturers and young people involved in culture and art to improve themselves, congregate, compete, and demonstrate their creativity. The city also aims to develop into a city whose residents love and take pride in their history of traditional crafts and performing arts, and whose citizens can experience a good quality of life by participating in cultural events while supporting local artisans and artists.
