

Kanazawa Flood Hazard Map

Misogura Area

Flood (estimated maximum scale)  
that occurs once every  
1000 years or more

Rainfall criteria prerequisite for estimated flooding area designation

This hazard map shows the expected result of the following rivers overflowing due to the amount of rainfall detailed below (which only occurs once every 1000 years or more).

- Relevant rivers and rainfall amount:  
Saigawa River: 860mm of rainfall in two days  
Asanogawa River: 914mm of rainfall in two days

Estimated flooding areas and flood water depth may differ from the map due to rainfall exceeding the estimated maximum scale, sediment, fallen trees, etc.

\*2nd floor and above available

Nagadohe Kominkan Community Ctr.

Nagadohe Fire Brigade

\*2nd floor and above available

Nagadohe Youth Exchange Ctr.

\*2nd floor and above available

Chuo Shimin Taiikukan Gym

Legend

Designated emergency evacuation places

Schools, community centers, etc.

Parks, squares

Evacuation information

Water level observation station, Water level gauge

River monitoring camera

Disaster prevention radio broadcast system

Dangerous points on the evacuation route

Bridge / Underground passage

Bridge / Underpass

Map symbols

Government office

Fire station / Fire brigade etc.

Police station / Police box

Hospital

Administrative boundary

School zone (block) boundary

Main highway

Note: School zone (block) boundaries shown on the map are approximate.

Estimated hazardous areas

Estimated flooding areas and flood water levels

5.0 m - Flooding above 2nd floor roof

3.0 - 5.0 m Flooding up to 2nd floor ceiling

0.5 - 3.0 m Flooding up to 1st floor ceiling

0 - 0.5 m Flooding up to adult knee

When the top floor is flooded: Early evacuation

When the top floor is not flooded: Evacuation \*Note 1

Note 1: As an exception, taking shelter inside is also possible. Check the evacuation procedure.  
Note 2: If evacuation is unsafe, take shelter inside (vertical evacuation)

Areas where buildings may collapse or be washed away

Areas where bank erosion may occur

Areas where overflow may occur

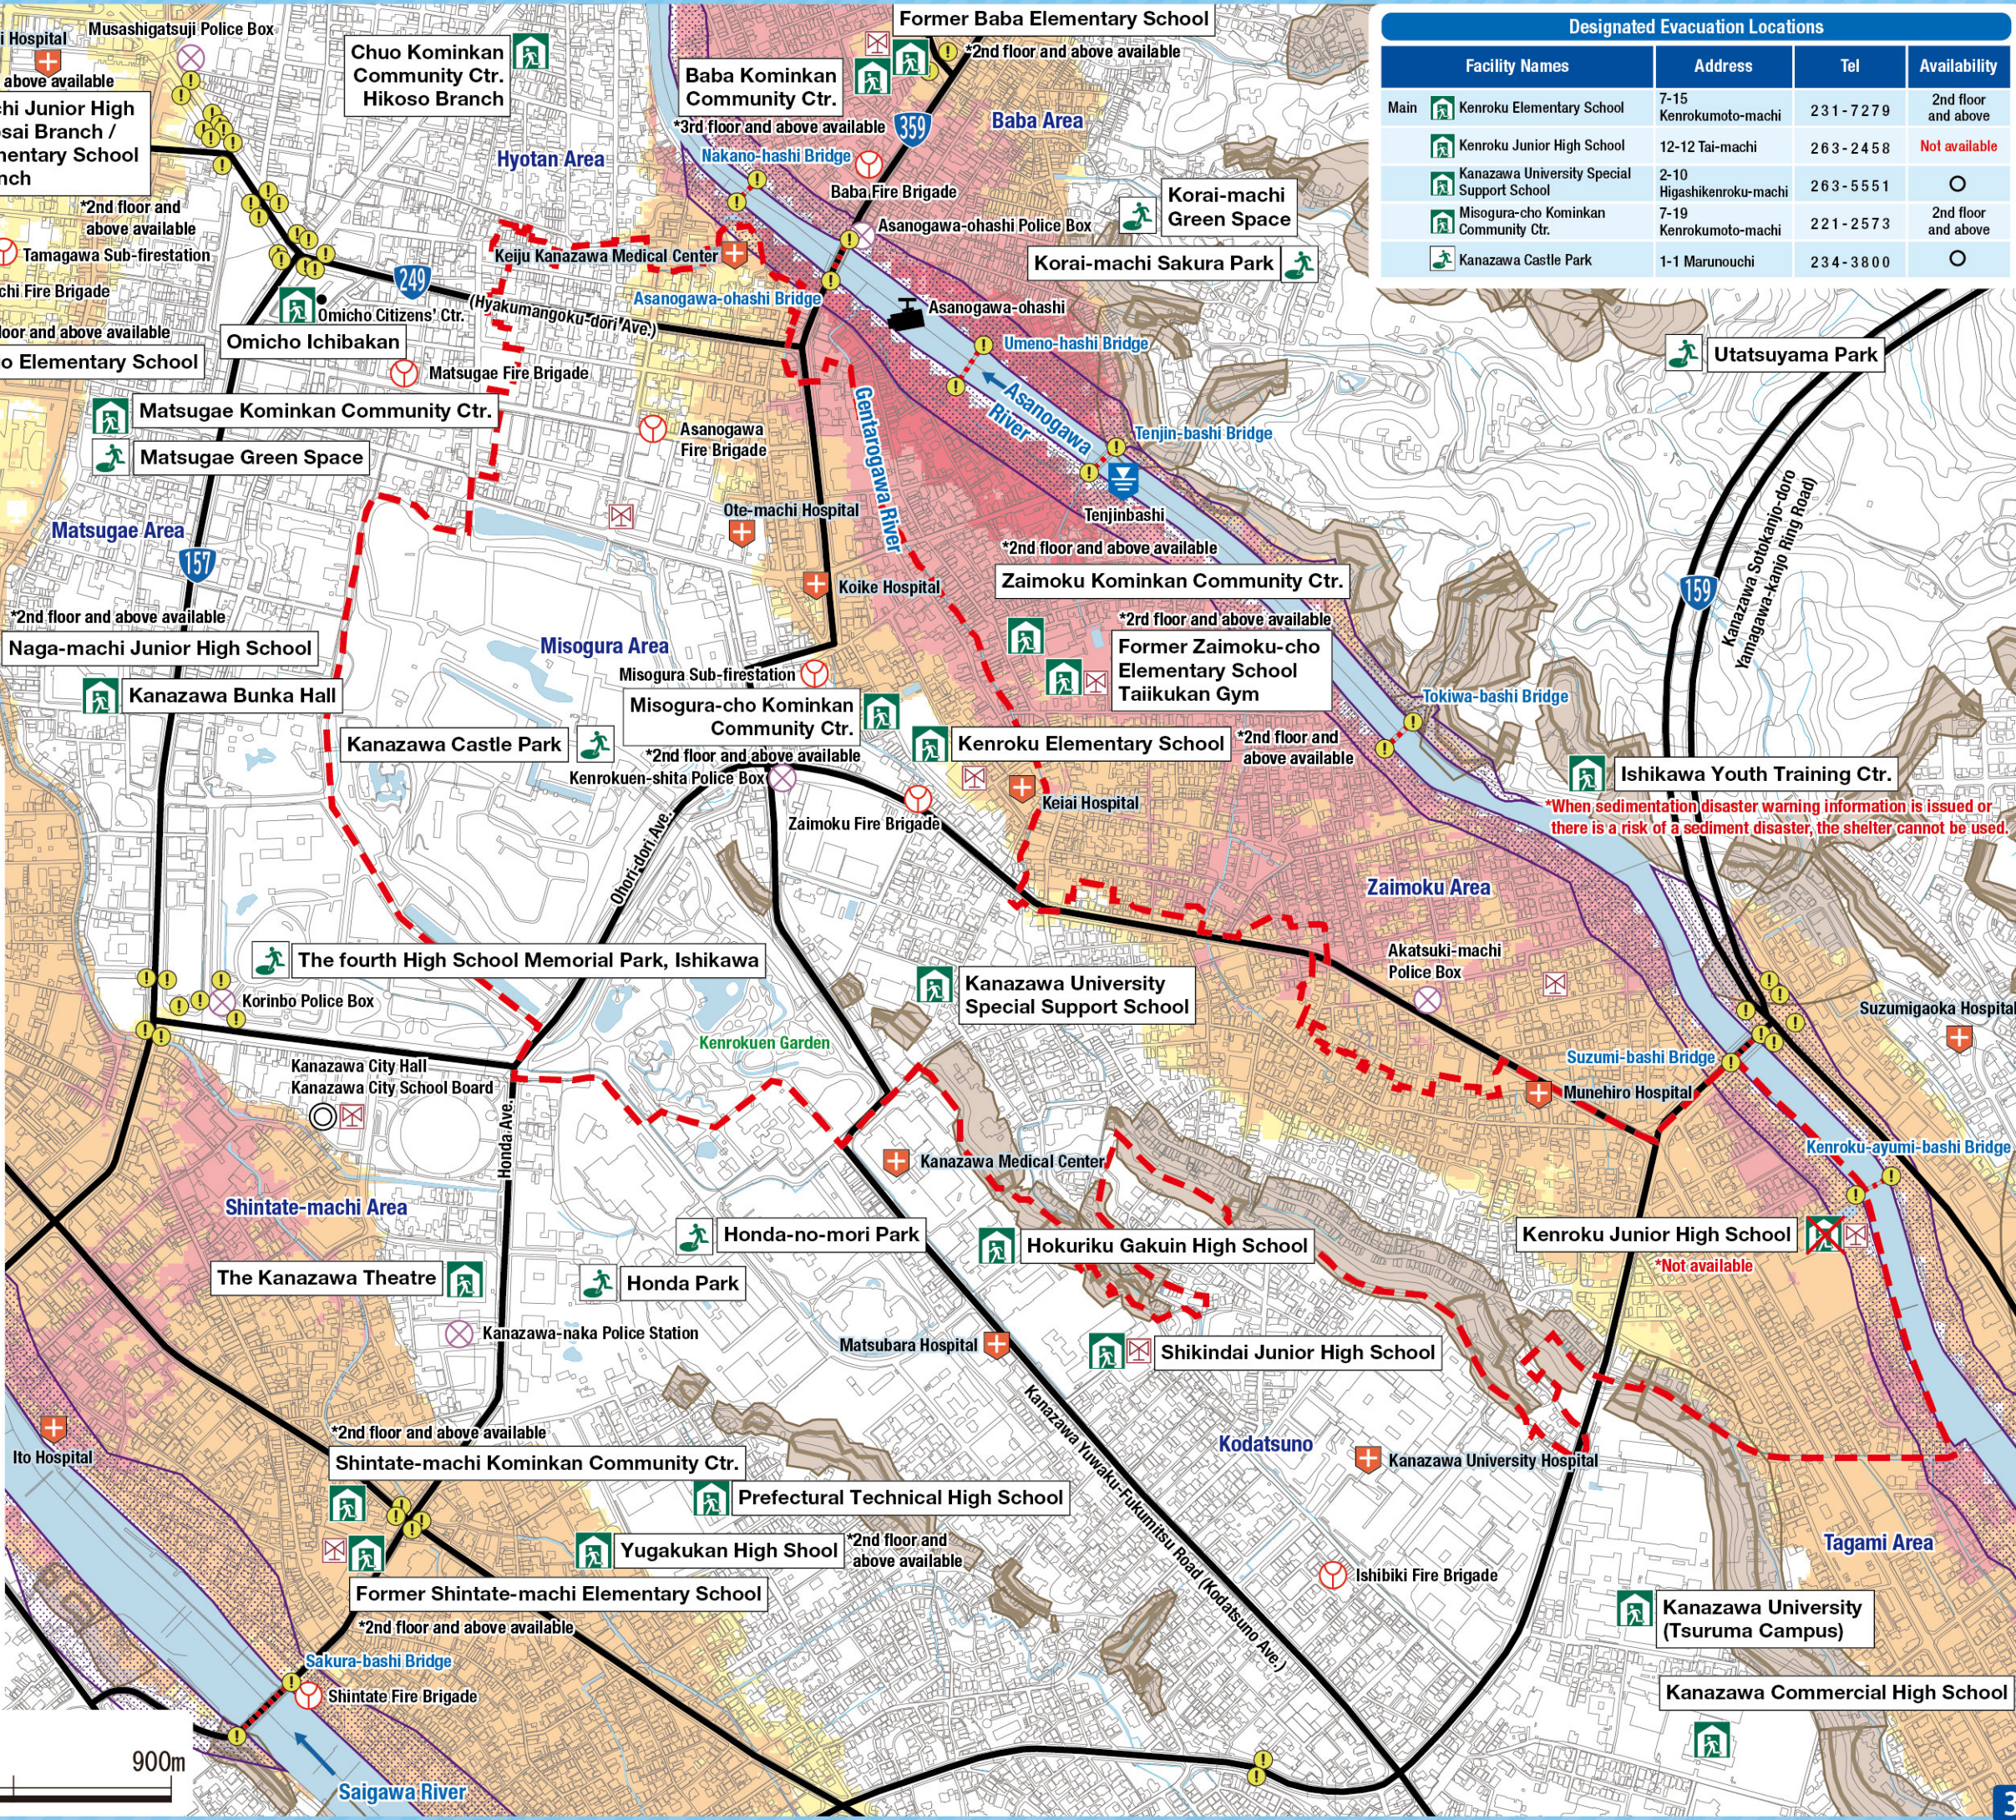

Early evacuation

Sediment disaster

Sediment disaster risk area

Sediment disaster hazard area

Early evacuation

Designated Evacuation Locations

Facility Names	Address	Tel	Availability
Main Kenroku Elementary School	7-15 Kenrokumoto-machi	231-7279	2nd floor and above
Kenroku Junior High School	12-12 Tai-machi	263-2458	Not available
Kanazawa University Special Support School	2-10 Higashikenroku-machi	263-5551	
Misogura-cho Kominkan Community Ctr.	7-19 Kenrokumoto-machi	221-2573	2nd floor and above
Kanazawa Castle Park	1-1 Marunouchi	234-3800	

\*When sedimentation disaster warning information is issued or there is a risk of a sediment disaster, the shelter cannot be used.

\*Not available

Kanazawa Flood Hazard Map

Misogura Area

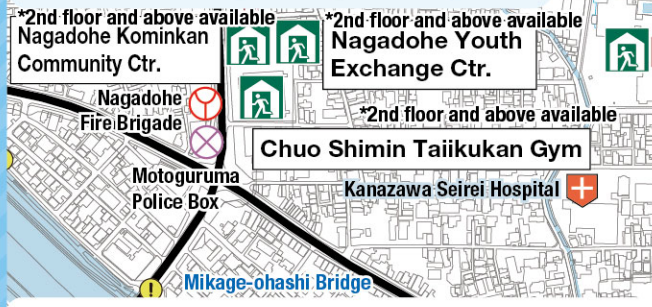

Flood (estimated flood scale)  
that occurs approx.  
once every 100 years

Rainfall criteria prerequisite for estimated flooding area designation

This hazard map shows the expected result of the following rivers overflowing due to the amount of rainfall detailed below (which only occurs approx. once every 100 years).

- Relevant rivers and rainfall amount:  
Saigawa River: 314mm of rainfall in two days  
Asanogawa River: 256mm of rainfall in two days

Estimated flooding areas and flood water depth may differ from the map due to rainfall exceeding the estimated scale, sediment, fallen trees, etc.

**Legend**

**Designated emergency evacuation places**

- Schools, community centers, etc.
- Parks, squares

**Evacuation information**

- Water level observation station, Water level gauge
- River monitoring camera
- Disaster prevention radio broadcast system

**Dangerous points on the evacuation route**

- Bridge / Underground passage
- Bridge / Underpass

**Map symbols**

- Government office
- Fire station / Fire brigade etc.
- Police station / Police box
- Hospital
- Administrative boundary
- School zone (block) boundary
- Main highway

Note: School zone (block) boundaries shown on the map are approximate.

**Estimated hazardous areas**

**Estimated flooding areas and flood water levels**

Flood Water Level	Flooding Description	Evacuation Action
5.0 m -	Flooding above 2nd floor roof	When the top floor is flooded: Early evacuation
3.0 - 5.0 m	Flooding up to 2nd floor ceiling	When the top floor is not flooded: Evacuation
0.5 - 3.0 m	Flooding up to 1st floor ceiling	
0 - 0.5 m	Flooding up to adult knee	

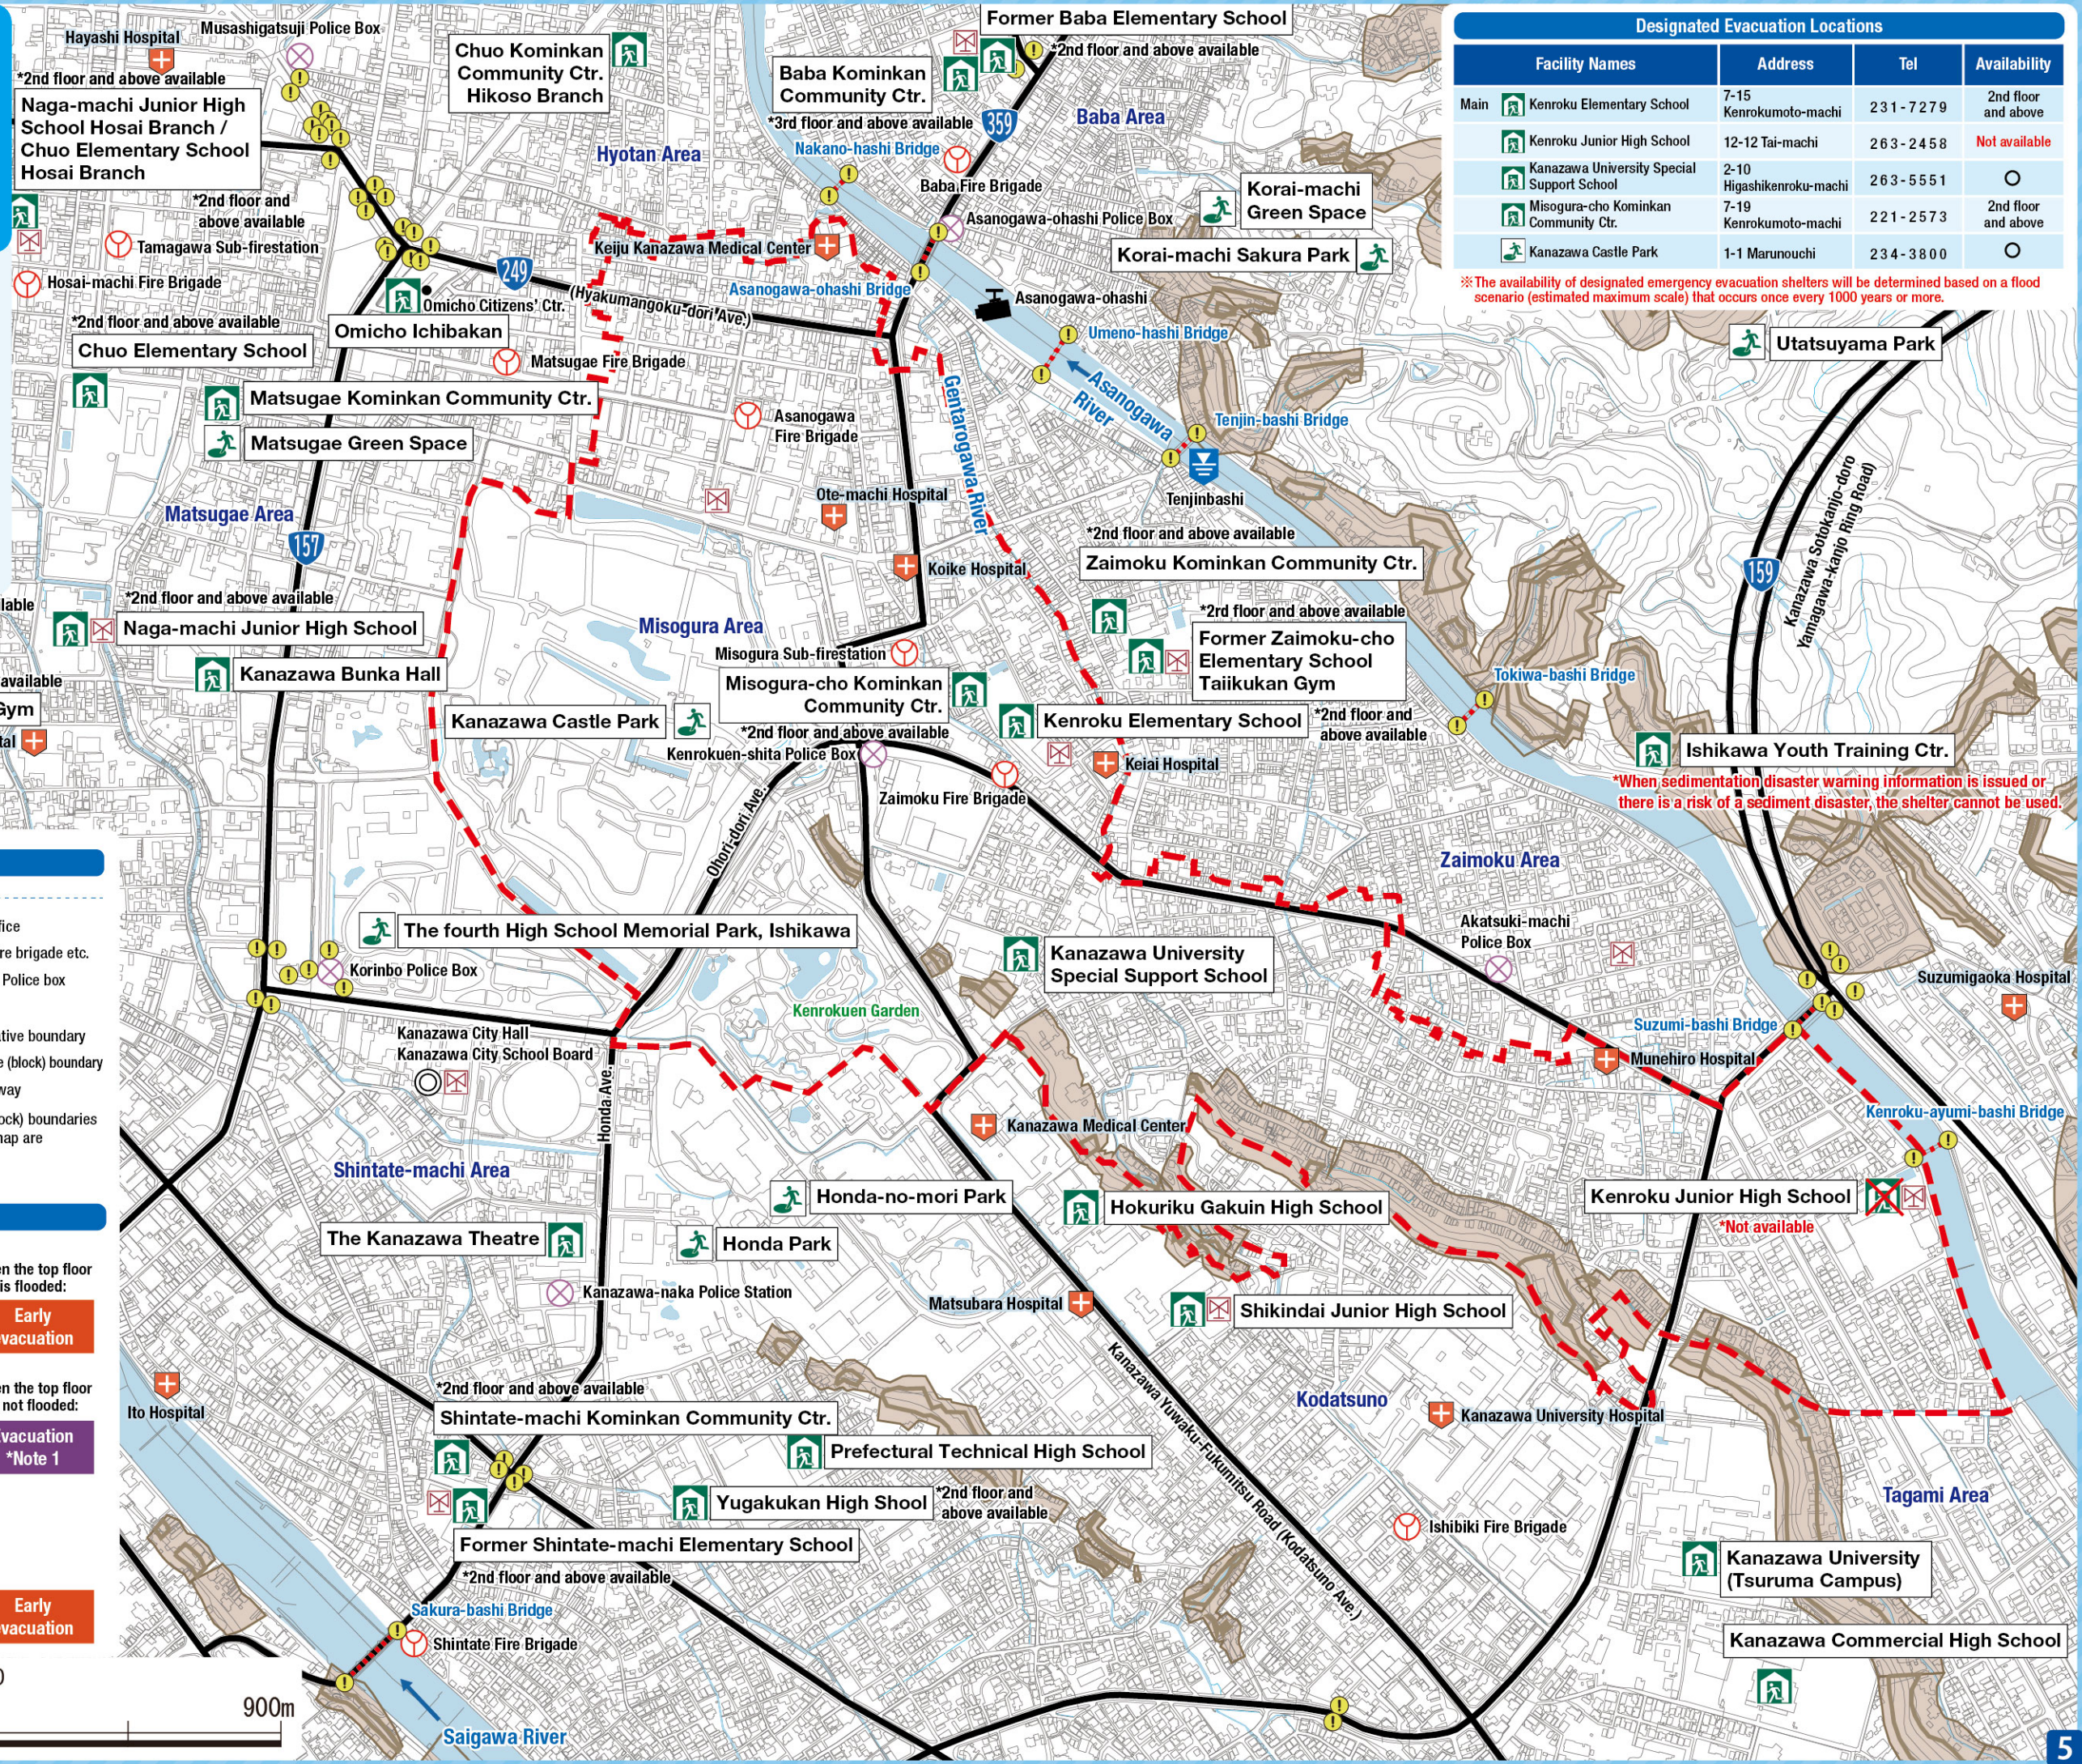

Note 1: As an exception, taking shelter inside is also possible. Check the evacuation procedure.  
Note 2: If evacuation is unsafe, take shelter inside (vertical evacuation)

**Sediment disaster**

Sediment disaster risk area

Misogura-cho Kominkan Community Ctr.	7-19 Kenrokumoto-machi	221-2573	2nd floor and above
Kanazawa Castle Park	1-1 Marunouchi	234-3800	

※ The availability of designated emergency evacuation shelters will be determined based on a flood scenario (estimated maximum scale) that occurs once every 1000 years or more.

\*When sedimentation disaster warning information is issued or there is a risk of a sediment disaster, the shelter cannot be used.

Kanazawa Flood Hazard Map  
Misogura Area

Inland flood  
(estimated maximum scale)  
that occurs once every 1000 years or more

Rainfall criteria prerequisite for estimated flooding area designation

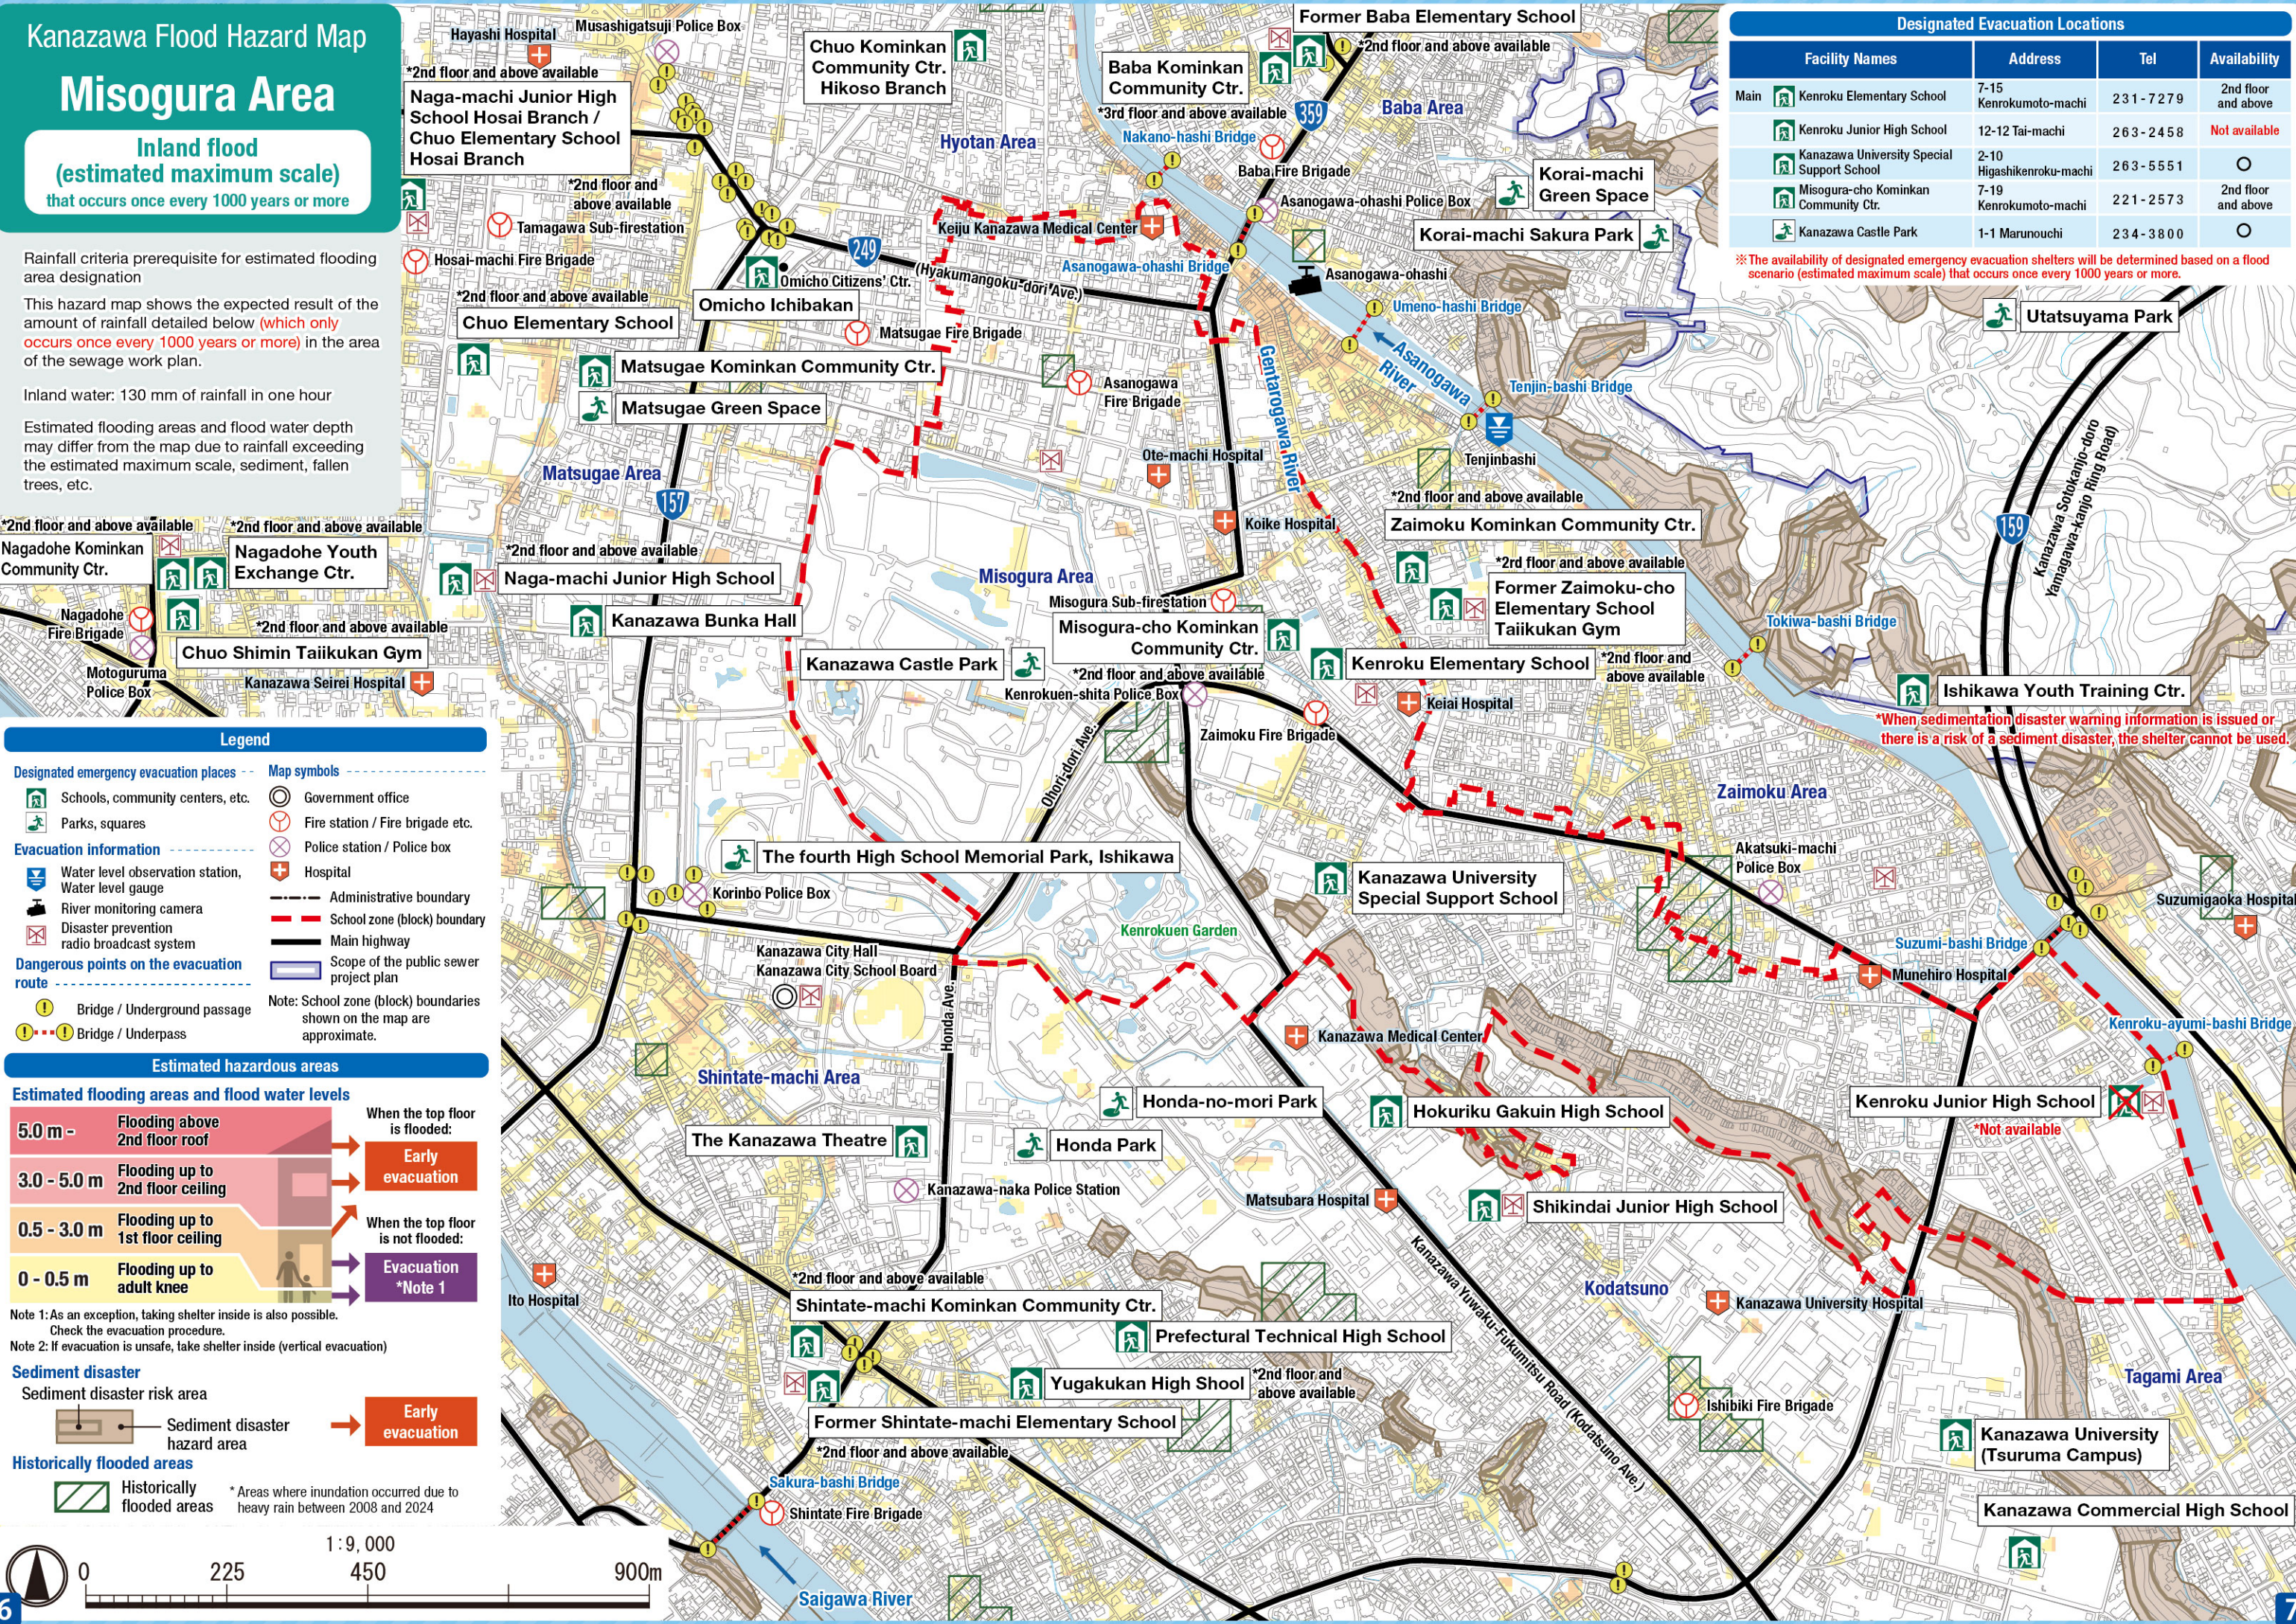

This hazard map shows the expected result of the amount of rainfall detailed below (which only occurs once every 1000 years or more) in the area of the sewage work plan.

Inland water: 130 mm of rainfall in one hour

Estimated flooding areas and flood water depth may differ from the map due to rainfall exceeding the estimated maximum scale, sediment, fallen trees, etc.
