

# Chisaka School Zone

Heavy rain that occurs once every 1000 years or more  
Estimated maximum scale

### Rainfall criteria prerequisite to designation of estimated flooding areas

- Asanogawa River: two day total rainfall 914mm
- Kanakusari-gawa River: two day total rainfall 938mm
- Morimotogawa River: two day total rainfall 919mm
- Onogawa River/ Kahoku Lagoon:  
two day total rainfall 768mm
- Inland water: one hour rainfall 130mm  
(Heavy rain that occurs once every 1000 years or more in general)

Estimated flooding areas due to **estimated maximum scale rainfall (once every 1000 years or more)** for river overflow flooding and inland water flooding show the range and risk of flooding. In addition, areas historically flooded since 2008 or later are included.

Please note there is a potential for flooding in the areas outside the estimated areas, depending on rainfall conditions.

### Legend

#### Symbols for evacuation

- Main evacuation center
- Designated evacuation center (indoor)
- Main highway

#### Dangerous points on the way to evacuation

- Underground
- Bridge, underpass

#### Map symbols

- Administrative boundary
- School zone (block) boundary
- Government office
- Fire station, fire brigade, etc.
- Police station, police box, etc.
- Hospital
- Disaster radio broadcast system
- Water level observation site

Note1: School zone (block) boundaries are approximate.

Note2: The names of evacuation centers in school zones (blocks) are shown in thick-bordered boxes.

### Estimated flooding areas and maximum water level

#### River overflow flooding

- 5.0m~ Flooding above 2nd floor roof
- 3.0~5.0m Flooding of 2nd floor
- 0.5~3.0m Flooding up to 1st floor ceiling
- 0~0.5m Flooding up to adult knee

#### Inland water flooding

- 0.5m~ \*Evacuation difficult due to water flow
- 0~0.5m

**Historically flooded area**  
\* Areas where flooding occurred due to heavy rain in 2008 or later

Note: See P11 for the difference between river overflow flooding and inland water flooding.

### Evacuation

Areas where evacuation is required (due to building collapse)

#### Riverbank erosion

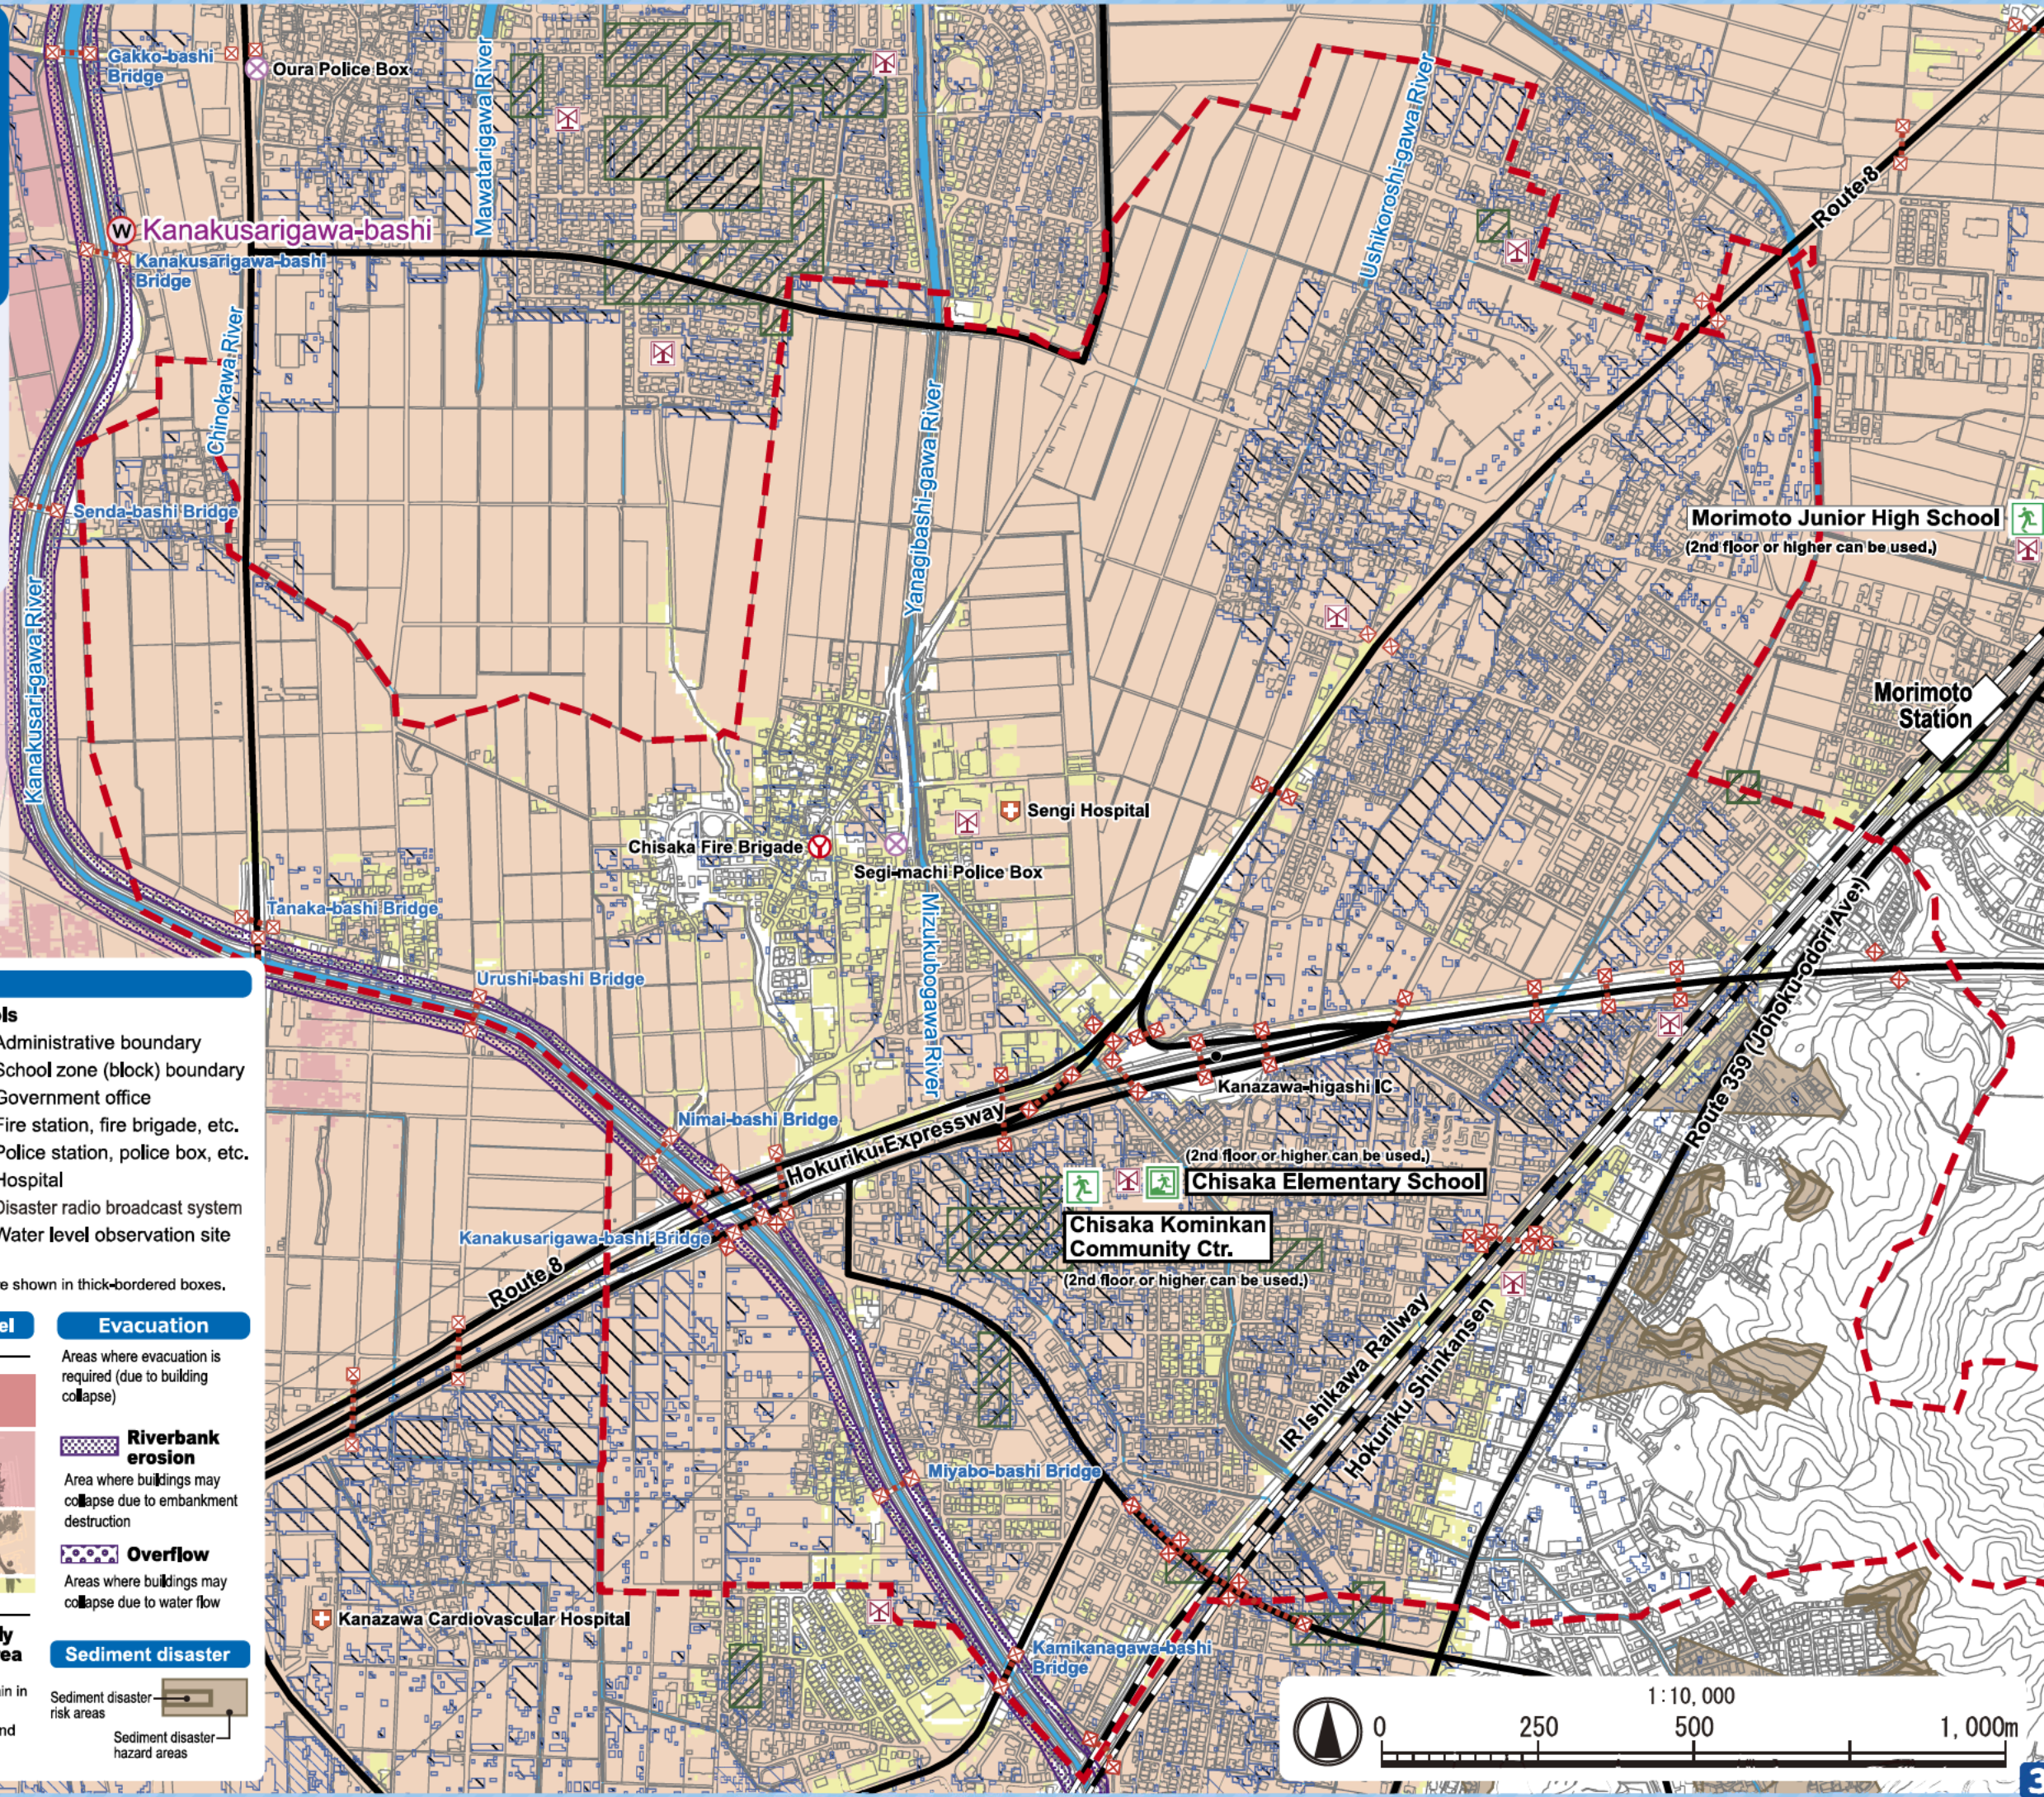

Area where buildings may collapse due to embankment destruction

#### Overflow

Areas where buildings may collapse due to water flow

#### Sediment disaster

Sediment disaster risk areas  
Sediment disaster hazard areas

# Chisaka School Zone

**Heavy rain that occurs once every 50~100 years**  
**Estimated flood scale**

**Rainfall criteria prerequisite to designation of estimated flooding areas**

Asanogawa River: two day total rainfall 256mm  
 Kanakusari-gawa River: two day total rainfall 237mm  
 Morimotogawa River: two day total rainfall 237mm  
 Onogawa River/ Kahoku Lagoon:  
 two day total rainfall 256mm  
 (Heavy rain that, in general, occurs once every 50~100 years)

This hazard map shows a simulation of river overflow flooding due to heavy rain that **occurs once every 50~100 years (in general)**, including the range and risk of flooding. In addition, areas historically flooded due to inland water flooding since 2008 or later are included. Please note there is a potential for flooding in the areas outside the estimated areas, depending on rainfall conditions.

**Legend**

<b>Symbols for evacuation</b>	<b>Map symbols</b>
Main evacuation center	Administrative boundary
Designated evacuation center (indoor)	School zone (block) boundary

# My Family's Disaster Notebook

● Fill in the blanks to complete your disaster notebook.

## Evacuation centers/ Evacuation routes

\* Determine multiple evacuation centers and multiple routes there, and mark them on the map.

Evacuation centers

## Items to carry

\* Share information of the storage places among family members.

Storage places

## Shared commitment

\* Please cooperate in your community to help people who need evacuation support.

Commitment

(For reference) Evacuation centers in your area and nearby areas (The available floors are for estimated maximum scale rainfall)

Name	Address	Tel	Available floors
Chisaka Elementary School	1-125 Segi	258-1270	2nd floor or higher
Chisaka Kominkan Community Ctr.	1-119 Segi	257-0670	2nd floor or higher
Morimoto Junior High School	Yo-22 Miroku-machi	258-0059	2nd floor or higher

\* Evacuation centers in your area and nearby areas are indicated in blue and yellow-green, respectively.

## Contacts in Emergency/ Disaster

### Tel No. in Emergency/ Disaster

- Fire** Fire/ Ambulance/ Rescue ☎ **119**
- Police** Crime/ Security/ Traffic accidents ☎ **110**
- Emergency broadcast telephone service** ☎ **0180-997171**
- Roads**  
Road Maintenance Section, Kanazawa City ☎ **076-220-2321**
- Sewage/ City water/ Gas leakage**  
Water & Energy Center, Kanazawa City ☎ **076-220-2281**
- Power failure/ Electric pole or cable damage**  
Hokuriku Electric Power Company ☎ **0120-837119**

### If telephone is not available

In the case of a large-scale disaster, the use of general telephones and mobile phones is restricted. Please use NTT Disaster Emergency Message Dial or the message board system of your mobile phone carrier to contact your family or friends.

**Disaster Emergency Message Dial** ☎ **171**

Please follow the audio guidance.

**Disaster Emergency Message Board**
