Heavy rain that occurs once every 1000 years or more  
Estimated maximum scale

### Rainfall criteria prerequisite to designation of estimated flooding areas

Saigawa River: two day total rainfall 860mm  
Asanogawa River: two day total rainfall 914mm  
Inland water: one hour rainfall 130mm  
(Heavy rain that occurs once every 1000 years or more in general)

Estimated flooding areas due to **estimated maximum scale rainfall (once every 1000 years or more)** for river overflow flooding and inland water flooding show the range and risk of flooding. In addition, areas historically flooded since 2008 or later are included.

Please note there is a potential for flooding in the areas outside the estimated areas, depending on rainfall conditions.

#### Estimated flooding areas and maximum water level

##### River overflow flooding

- 5.0m~ Flooding above 2nd floor roof
- 3.0~5.0m Flooding of 2nd floor
- 0.5~3.0m Flooding up to 1st floor ceiling
- 0~0.5m Flooding up to adult knee

##### Inland water flooding

- 0.5m~ \*Evacuation difficult due to water flow
- 0~0.5m

##### Historically flooded area

\* Areas where flooding occurred due to heavy rain in 2008 or later

Note: See P11 for the difference between river overflow flooding and inland water flooding.

#### Evacuation

Areas where evacuation is required (due to building collapse)

#### Riverbank erosion

Area where buildings may collapse due to embankment destruction

#### Overflow

Areas where buildings may collapse due to water flow

Heavy rain that occurs once every 100 years  
Estimated flood scale

### Rainfall criteria prerequisite to designation of estimated flooding areas

Saigawa River: two day total rainfall 314mm  
Asanogawa River: two day total rainfall 256mm  
(Heavy rain that, in general, occurs once every 100 years)

This hazard map shows a simulation of river overflow flooding due to heavy rain that occurs once every 100 years (in general), including the range and risk of flooding. In addition, areas historically flooded due to inland water flooding since 2008 or later are included.

Please note there is a potential for flooding in the areas outside the estimated areas, depending on rainfall conditions.
